

Worldox® GX3 Cloud

All the power and ease-of-use Worldox is known for – *only now in the cloud.*

Worldox GX3 Cloud is something completely new in document management.

Cloud-hosting is not new, of course. But a cloud-based document management system (DMS) without the compromises of a limited-function web interface ... that **really is different**.

GX3 Cloud uses a patent-pending communications platform to seamlessly connect remote resources – cloud servers hosting the Worldox application and all Worldox-managed documents – to local applications. Users see their familiar desktops, not separate, self-contained environments. If you don't tell them their files are in the cloud now, they'd probably never know. **It's completely transparent.**

Another very important difference for busy financial services firms: Unlike other remote-access DMS solutions, **Worldox GX3 Cloud** makes few if any feature compromises and virtually no changes in how this cloud-hosted version looks and behaves compared to our best-selling desktop product.

- **Innovative, patent-pending technology** allows the cloud-hosted Worldox to communicate in real-time with local applications and files.
- Only the Worldox application set – plus necessary resources and Worldox-managed files – are in the cloud, SaaS-hosted at our cloud data centers. All your other applications are local.
- A centralized server environment accessible from any broadband internet connection provides unlimited remote access capabilities.
- **Completely secure, fully-encrypted** data communications.
- **Truly affordable**, modest monthly fee.
- **Not a limited-feature, web-based tool.** All the features that make Worldox such a popular, cost-effective document management solution are here.
- It's an advanced document management solution, delivering **far more than the basic tools and simple folder structure proposed by other providers.**

**Worldox GX3 Cloud –
something completely
NEW in document
management!**

GX3 Cloud powered by Rackspace OpenStack

Rackspace maintains various certifications to assist you in verifying our security policies and processes. Rackspace has been assessed and holds validation for the following compliance frameworks:

- **ISO 27001**
- **SSAE 16 and ISAE 3402 (Previously SAS 70 Type II)**
- **PCI DSS**
- **Safe Harbor (export.gov)**

Please note that Rackspace certifications alone do not make you compliant with your specific regulatory and compliance requirements. However, we do offer products and services that can assist you in addressing your requirements. For more information, please talk with your Trumpet solutions provider.

Award-winning Document Management tools – *anytime, anywhere*

Worldox has long been a top DMS choice for financial advisory and legal firms. Why? It's the powerful feature set and remarkably easy-to-use interface. The new Worldox *GX3 Cloud* offers those same advantages via cloud deployment – quick and seamless document access for firms who choose to manage information in a remote, centralized data center model.

***GX3 Cloud* looks, feels and responds like a local application.** It is not a local application, but users won't know that unless you tell them. Because *GX3 Cloud* acts local, communicates with local applications, responds in every way as if it were just another local application.

There is no other DMS product like it. This communication model is entirely new, something available nowhere else.

Proven, immediate benefits

- 1. Control:** Standardized client/topic lists eliminate variations in how documents are filed and retrieved, eliminating errors.
- 2. All file types:** Worldox handles scanned images, e-mail, spreadsheets, Word docs, PDFs, et al. – all common file formats you are likely to encounter.
- 3. Powerful search tools:** Allows quick search by 'profile' category and/or text. Searches can be saved for re-use.
- 4. Integrates** automatically with MS Office, with major e-mail packages, with most popular business software applications.
- 5. Very low cost,** modest monthly fee.
- 6. Award-winning technical support:** It's one reason Worldox is so popular, a big part of why Worldox customers are so satisfied – and loyal.

When is GX3 Cloud the right choice?

If your firm wants to off-load document storage – greatly reducing cost and resources needed in your own data center – Worldox *GX3 Cloud* may be the optimal solution. *GX3 Cloud* is safe, robust, and transparent to users. ***All the proven power of Worldox, only now it's in the cloud.***
