About Trumpet, Inc.

Since 1999, Trumpet has developed and supported software products for the financial, legal and other professional industries. We are a unique and fast-paced organization that is achieving strong growth while maintaining work-life balance and having a great time with our team. We are proud that our culture is built on creativity, innovation, dedication and enthusiasm. To us, cultural fit is as important as strategic fit.

Position Description

Trumpet, Inc. seeks a Senior Software Product Developer to create new software products as well as add functionality to existing software.

It takes a special person to succeed at Trumpet, one who has the confidence and work ethic to believe in their ability to imagine, share, market and implement great ideas. We are looking for more than just an employee – we are searching for a new addition to our team. If you are a seasoned developer who is passionate about programming, loves understanding systems at multiple levels (including the human level), enjoys working with users, and are comfortable taking the lead on a variety of projects, we would like to talk with you.

What you need for this position:

- 10+ years of development experience (Java and/or .NET) with complex applications
- A passion for software design and architecture coupled with a love of writing code
- Familiarity with agile development philosophies
- Ability to prioritize and balance multiple tasks
- A sense of humor
- A desire to make things more efficient – for yourself, for your team and for your users
- Excellent follow-through with minimal supervision

What does this position entail?

The Senior Developer will become the lead developer at Trumpet, taking over primary development responsibilities from our CEO. Development in this position will be externally focused, developing the products that are sold to our customers. Our product line is primarily developed in Java, but also includes C++, html and javascript.

As the Senior Developer, you will:

- Innovate
  - Work with internal and external customers to improve and extend existing products
  - Work with internal and external customers to create new products
  - Develop usable functionality as quickly as possible
  - Rapidly iterate based on user feedback

- Maintain
  - Help the support desk with support items that involve development
  - Improve the software to prevent support items from occurring

- Improve
  - Continuously improve the software development process
  - Evaluate enhancement and new product ideas
  - Educate your internal team on product features and enhancements

What's in it for you?

- We provide a competitive salary plus bonuses
- Trumpet has a great revenue growth outlook, is cash flow positive and well capitalized
- We have a great location in the Ahwatukee area of Phoenix – just off of I-10 and close to biking and hiking in South Mountain
- Benefits include: A benefit fund to use as you wish, a retirement plan with employer match, paid holidays, open vacation policy, continuing education benefit, and quarterly team fun days

Why work with us?

- Trumpet's customer base is professional, collaborative and engaging
- You will work with a team of enthusiastic and service-oriented people who are dedicated to continuous improvement and innovation
- You will have consistent opportunities for growth, both professionally and personally
- We like to have fun - we host quarterly team outings (hiking, laser tag, painting – help us choose our next event!)
- Relaxed dress code!

Please email us at developer@trumpetinc.com with any questions or to submit your resume. Please, no calls about this position.
